

MICHAEL DONALD GOSLIN

New York, NY • (347) 360-5842 • michael.goslin@gmail.com

PROFESSIONAL SUMMARY

Senior Information Technology Professional with over 25 years of experience architecting secure enterprise environments and leading high-performing IT operations. Proven record of driving infrastructure modernization, automating complex workflows, and enhancing cybersecurity posture for large-scale institutions. Adept at bridging the gap between technical teams and executive stakeholders to deliver scalable, compliant, and resilient technology solutions.

TECHNICAL SKILLS & EXPERTISE

- **Cloud & Infrastructure:** Windows Enterprise, Linux, MacOS, Virtualization, VMs, Intune, Workstation/Server Config & Deployment, and Cloud Solutions Architecture.
- **Cybersecurity & Networking:** NAC, IDS/IPS, Identity & Access Management (IAM), Endpoint Security, DNS, TCP/IP, VPN, and Disaster Recovery/Business Continuity.
- **Software Development & Automation:** Python, PowerShell, SQL, .NET, JSON, REST APIs, EDI, OCR, Database Development, and Systems Automation.
- **Emerging Technology & Strategy:** Generative AI, Systems Architecture, IT Infrastructure Modernization, and Requirements Analysis.
- **Enterprise Operations:** Project Management, Vendor Management, Compliance, Team Leadership, A/V, Zoom, Teams, G-Suite, and Microsoft Office/Project/Visio.

PROFESSIONAL EXPERIENCE

Independent Consultant / Professional Development | New York, NY IT Advisor | 2022 – Present

- **Infrastructure Strategy:** Provided expert-level consultation on network security and management, helping businesses optimize workstation and server configurations for maximum uptime.
- **Modernization & AI:** Leveraged advanced coursework in Generative AI and Cloud Solutions Architecture to advise clients on integrating emerging technologies into existing workflows.
- **Migration Management:** Executed complex data migrations using industry-standard tools, ensuring data integrity and zero-downtime transitions for client systems.
- **Scalability & Virtualization:** Applied virtualization principles to modernize client environments, streamlining resource allocation and reducing hardware overhead.

COLUMBIA UNIVERSITY

Associate Director, Information Systems — 2015 – 2022

- **Infrastructure Modernization:** Architected and executed a comprehensive infrastructure overhaul, reducing critical incidents and network latency by **75%**.
- **Strategic Leadership:** Managed annual IT budget, advising executive leadership on long-term technology planning, compliance, and lifecycle management.
- **Project Management:** Directed cross-functional technical upgrade projects, successfully completing **50+** system integrations and enhancements on schedule.
- **Cybersecurity & Risk:** Spearheaded risk assessments and remediation protocols, successfully closing **95%** of identified vulnerabilities.
- **Team Development:** Led a team of system administrators, establishing operational standards that reduced issue resolution time by **75%**.

Information Systems Manager — 2011 – 2015

- **Compliance & Governance:** Established cybersecurity best practices and compliance controls, reducing external audit findings to **zero**.
- **Vulnerability Management:** Remediated technical specifications and codebases, eliminating high-risk vulnerabilities across the ecosystem.
- **Identity Management (IAM):** Oversaw user provisioning and credential lifecycles for **100+** users, ensuring secure IAM governance and strict access controls.
- **Vendor Relations:** Managed vendor SLAs and negotiated contracts to ensure system compliance and data accuracy.
- **Process Optimization:** Developed and delivered a standardized onboarding curriculum, reducing new staff training time by **75%**.

Systems Developer — 1996 – 2011

- **System Automation:** Modernized legacy systems through rigorous automation, improving operational efficiency by **85%**.
- **Enterprise Development:** Designed and deployed enterprise-grade applications supporting key academic workflows; managed the full SDLC from requirements to maintenance.
- **Data Security:** Implemented robust access structures and encryption policies to safeguard sensitive institutional data.

EDUCATION

Bachelor of Science in Information Technology

University of Technology (UTECH) — Kingston, Jamaica

Associate of Science in Computer Programming

Montego Bay Community College — Montego Bay, Jamaica
